**Household Waste Advisory for Saipan**

(CNMI Joint Information Center) – The public is advised to properly separate household trash, green waste, and metal waste when disposing of waste.

Household trash must not be mixed with green waste or metal waste. Green waste should be placed separately from regular garbage, and metal items should be disposed of only in the appropriate waste stream.

Mixing these materials creates cleanup problems, contaminates recyclable or compostable material, and may delay collection.

Residents are advised to dispose of household waste using their private trash collection agency, or to dispose of their household waste at the Lower Base Transfer Station or the Marpi Landfill.

More information regarding collection from agencies is below.
